Gross, Microscopic and Ultra structural Pathology of Ocular Abnormalities in Farmed Halibut

Published On: January 13, 2018 | Pages: 001 - 005

Author(s): David L Williams* and W Mary Brancker

This report documents the gross pathological appearance, histopathology and ultra-structural studies of the ocular abnormalities previously reported in farmed Atlantic halibut (*Hippoglossus hippoglossus*). 37% of eyes investigated were normal on gross and histopathological examination while 32% showed formation of an intraocular cyst in the choroid resulting in anterior ...
