Otolith Growth Pattern of *Puntius Schwanenfeldii* from the Koto Panjang Reservoir, Regency of Kampar, Riau, Indonesia

Published On: May 22, 2018 | Pages: 013 - 017

Author(s): Eni Sumiarsih and Kamaruddin Eddiwan*

Koto Panjang Reservoir is the largest reservoir in Riau Province, there are many efforts of floating net cage (KJA) by using feed (pellet) continuously. As a result of many feeds that settle in the bottom of the waters because it is not consumed by the fish. ...
