## Effects of water depth on growth performance of Indian major carps at a poly culture system in Bangladesh

Published On: August 05, 2019 | Pages: 014 - 021

Author(s): Md Hafi z All Hosen, Koushik Sarker, Mousumi Sarker Chhanda\* and Nipa Gupta

The main aim of this study was to assess the effect of water depth on the growth performance (length and weight) of table size Indian major carp (*Gibelion catla*, *Labeo rohita*, and *Cirrhinus mrigala*) fishes. Fishes were recorded under different depth (1.20 m, 1.80 m and 2.80 m) for about eight months from February 2016 to September 2016. Water depth was considered as ...
