The effect of mercury ions on the metabolic activity of *Poecilia Reticulata* cells

Published On: March 22, 2023 | Pages: 001 - 003

Author(s): Aleksey Afonin*, LN Komarova and ER Lyapunova

Among anthropogenic factors polluting ecosystems and affecting living organisms, mercury, and its compounds are the most toxic. In this study, we investigated the effect of mercury ions on freshwater live-bearing fish *Poecilia reticulata*. The cytotoxicity of mercury was analyzed on *Poecilia reticulata* fry using the MTT test. Studies have shown that small concentration ...
